

How to create  
a square from  
a non-square  
rectangle =

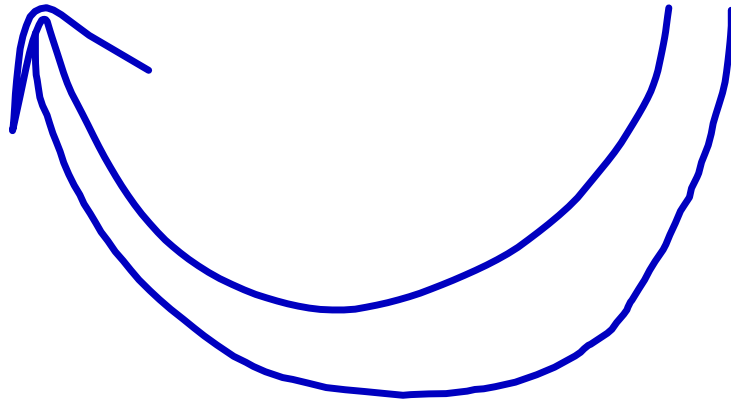

polygon  
quadrilateral  
parallelogram  
rectangle

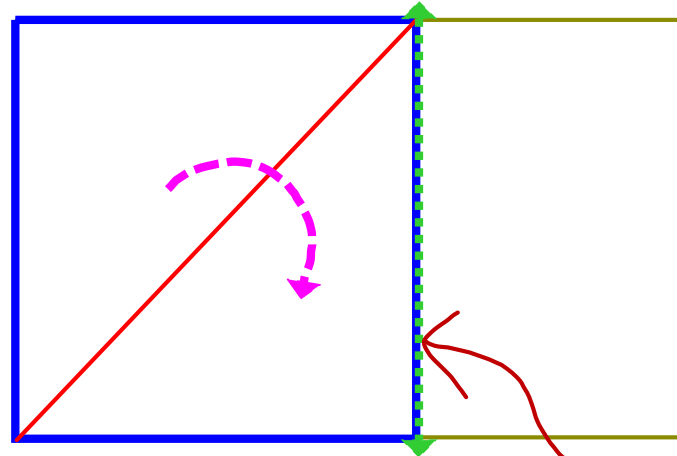

polygon  
quadrilateral  
parallelogram  
rectangle  
rhombus  
square

1 ← marks  
mean that  
the sides  
are equal

11 ← same  
thing, but  
it is equal  
to other  
side  
with 11  
mark

could  
we  
super-  
impose  
the square  
onto the  
rectangle?  
square

Fold &  
cut the  
paper  
on the  
dotted  
line.

\* Fold the rectangle along  
the red line (diagonal)  
to match the short  
side with the same  
distance on the long side.
